

## **Elite Video Additions – Time to try out the latest innovative technology to enhance your tennis game**

We are excited to share that there are two different types of video products available to members to begin using to improve your game. All 6 courts have an HD quality camera installed to provide footage of matches, lessons, and/or clinics. Anytime that you would like video footage delivered to a personalized Dropbox account for archive and easy viewing on a phone or TV, the process is quite simple. We want to make it convenient for all members to access this footage by simply texting: **929-356-9820** with your name, court # and start and stop time. About a day later, you will receive a text link back on your phone with the video footage from that session. It is that simple and we want you to give it a try to see if you find the footage beneficial overall.

The second option, *MOJJO*, exists only on Court 1 at this time. This amazing technology allows you to access a high level of detail on your matches or court sessions. You can see your serve speed and watch a typical one hour match back in about 15 minutes with all the downtime eliminated between points. Additionally, you can zoom in on particular points for more detail. The service comes straight from France and we are one of a handful of clubs in the USA to have the product available.

<https://www.mojjo.io/> Download the app to your phone.

All you have to do is access the touch panel on Court 1 and enter your email and play around with the neat features listed. There are several packages available which include:

On court training, Replay module, Service training module, Game training module for singles and doubles, Online matches, Live Streaming, Ladder tournaments and much more.

**Switch to rear angle  
in a click!**

Give these products a try and let's hear your thoughts on the products and see for yourself the enhancements added on the courts.
